

How to Create Dictionary from List of Tuples in Python?

Python – Create Dictionary from List of Tuples

To create a dictionary from list of tuples in Python, where each tuple is of the form (key, value), pass the list of tuples as argument to `dict()` builtin function.

`dict(list of tuples object)`

In this example, we will give a list for tuples as argument to `dict()` function.

Python Program

```
iterable = [('m', 4), ('p', 8)]  
myDictionary = dict(iterable)  
print(myDictionary)
```

Output

```
{'m': 4, 'p': 8}
```

Conclusion

In this Python Tutorial, we learned how to create a dictionary from a list of tuples using Python `dict()` builtin function.
