

Python `ascii()` Builtin Function – Examples

Python `ascii()`

Python `ascii()` builtin function

In this tutorial, we will learn about the syntax of Python `ascii()` function, and learn how to use this function with the help of examples.

Syntax

The syntax of `ascii()` function is

```
ascii()
```

where

Returns

The function returns

Example

In this example, we will

Python Program

Output

Conclusion

In this [Python Tutorial](#), we have learnt the syntax of Python `ascii()` builtin function, and also learned how to use this function, with the help of Python example programs.
