

How to Specify Account Determination in SAP

In this SAP tutorial, you will learn how to specify account determination in SAP Asset accounting. In our previous [SAP fico tutorial](#) we have learned [how to assign chart of depreciation to company code in SAP](#).

What is Account Determination?

In [SAP](#), account determinations are the keys that are used to link the asset classes or mater record to the general ledger (G/L) accounts based on the nature of transaction. The screen layout are required to process the information in respect of the assets by the users. The number range controls the number of assets in each class. So we need to create account determination, screen layouts and number ranges before [creation of assets classes](#).

Why do we call items as account determinations?

The item will decide which general ledge accounts are to be posted automatically.
