

How to define Shipping point in SAP | What is Shipping Point

In this SAP SD tutorials you will learn how to create shipping point in SAP step by step. In our previous training class we have learned how to define [sales office](#) and [sales group](#) in SAP.

What is Shipping Point?

“Shipping point is a place or location where the goods and services are delivered to the customers”.

Shipping point is an independent organizational unit in SAP SD module and it is responsible for processing inbound and outbound deliveries. So shipping point plays a major role in delivery of goods and services.

Shipping point Implementation process in SAP

You can define a shipping point in SAP through the following navigation method.

- **Transaction code:** – OVXD
- **Path:** – [SPRO](#) > [Implementation Guide](#) > Enterprise Structure -> Definition > Logistics Execution > Define copy, delete, check shipping point.

Step 1) Enter T-code [OVXD](#) in the sap command field and enter.

Step 2) On change view shipping points overview screen, click on new entries button for creation of new shipping point in [SAP systems](#).

Step 3) On new entries shipping point screen, update the following details.

1. **Shipping point:** – Enter the key that identifies the shipping point in SAP.
2. **Description:** – Update the text that describes about the shipping point.
3. **Times:** – Update the Factory calendar and working times of shipping point.
4. **Determine Time:** – Update the determining load time, pick/pack time and round working days..
5. **Form. text names:** – Under this field you can update texts for header, footer, greetings, etc.
