How to Install Tally ERP 9 Software on Windows computer

After downloading the latest version software of Tally ERP 9, you need to perform the following installation steps.

- Go to the folder, where the Tally software has been download on your computer

- Double click on the Tally application icon to install on your system. Now a user account control panel windows opens with the options “YES” or “NO” to allow the program to make changes to this computer. Click on “YES” option.

- Choose the installation folder and click on instal
- And install the Tally.ERP 9 on your computer.

Installing Tally ERP using Install Now / Online Installer

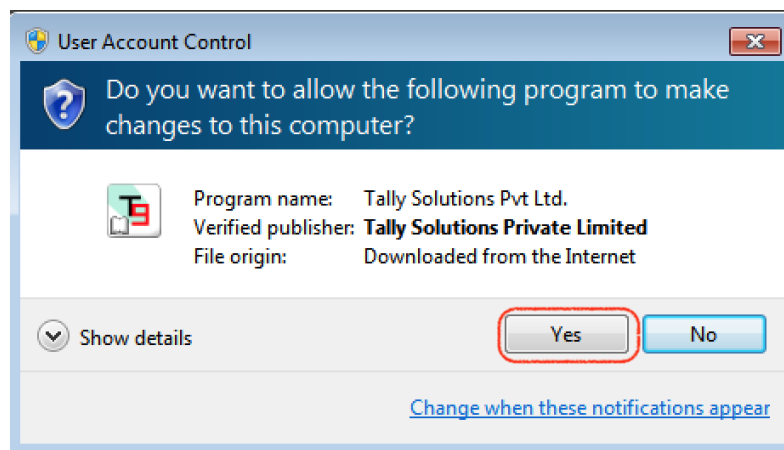

If you get any errors while installing the Tally ERP application with the downloaded software, you can try installation through online by choosing the option Install Now.

- Setup application will be download on your system, open the downloaded folder and double click on setup icon.

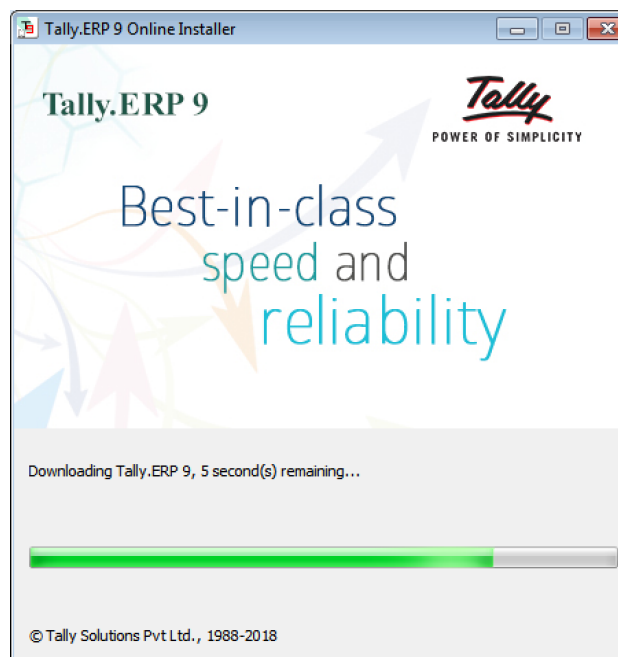

- Next User Account Control windows displays on the screen, choose **Yes** option to continue.

Now click on install option.

Now you will get a status bar of downloaded Tally software and will be installed on your system automatically.

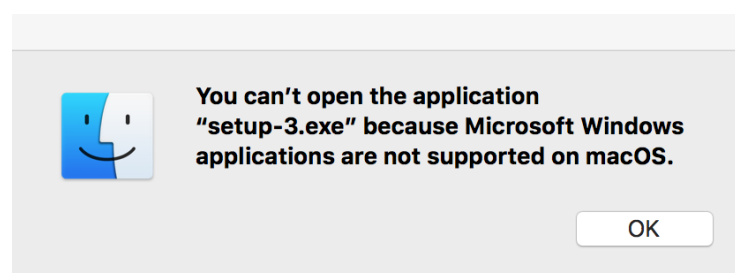

After installation of Tally, a message will be displayed as " You have successfully Installed Tally.ERP 9 series with version.

Successfully Tally ERP 9 Software has been installed on Windows Computer.

How to install Tally on Mac Os computer

Tally is supported on Microsoft window operation systems and not supported on Mac OS. If you try to install downloaded tally application on Mac, you will get an error message as

Here, We have a provided a simple solution to run Tally software application on Apple Mac OS computer. You can instal Tally ERP 9 on Mac by using any one of the option.

- 1. Install Xcode from App Store for Free*
- 2. Virtual Machine.*

Here we are going install Oracle VM and windows operation system. Refer below steps how to install.

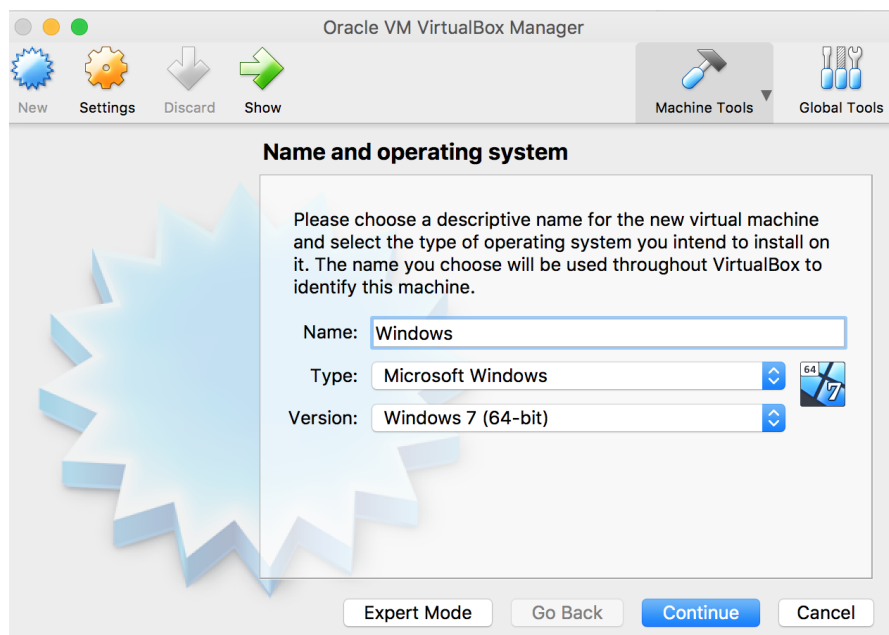

Step 1: Download Oracle Virtual Box (File Size: 95 Mb) – [click here to download](#)

Step 2: After download Oracle Virtual box, install on your system.

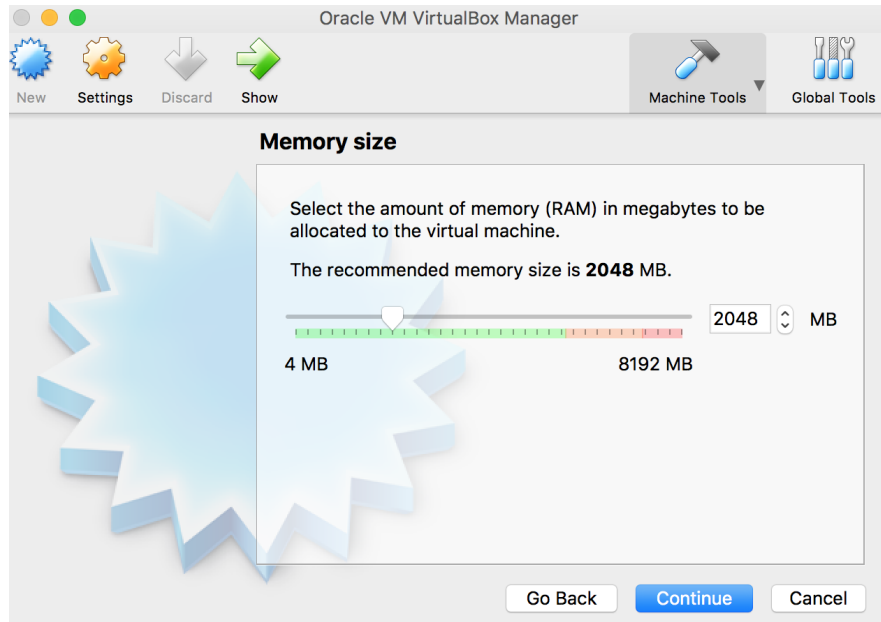

Step 3: After successfully installation of Oracle VM, choose new option for installation of Windows Os.

Step 4: Give the name, type of operating system and version of Os and click on continue. Here I am installing Windows 7 Operating system with 64 bit.

Step 6: Now allocate the Ram memory size for Oracle VM and click on continue.

Step 7: Choose create a virtual hard disk now and click on create.

Step 8: Choose VHD (Virtual Hard Disk)

Hard disk file type

Please choose the type of file that you would like to use for the new virtual hard disk. If you do not need to use it with other virtualization software you can leave this setting unchanged.

☐ VDI (VirtualBox Disk Image)
☒ VHD (Virtual Hard Disk)
☐ VMDK (Virtual Machine Disk)

Expert Mode Go Back Continue Cancel

Step 9: Choose dynamically allocated or fixed size

Storage on physical hard disk

Please choose whether the new virtual hard disk file should grow as it is used (dynamically allocated) or if it should be created at its maximum size (fixed size).

A **dynamically allocated** hard disk file will only use space on your physical hard disk as it fills up (up to a maximum **fixed size**), although it will not shrink again automatically when space on it is freed.

A **fixed size** hard disk file may take longer to create on some systems but is often faster to use.

☒ Dynamically allocated
☐ Fixed size

Go Back Continue Cancel

Step 10: Choose the file location and size of hard disk for VM and click on create.

File location and size

Please type the name of the new virtual hard disk file into the box below or click on the folder icon to select a different folder to create the file in.

Windows 

Select the size of the virtual hard disk in megabytes. This size is the limit on the amount of file data that a virtual machine will be able to store on the hard disk.

4.00 MB  32.00 GB

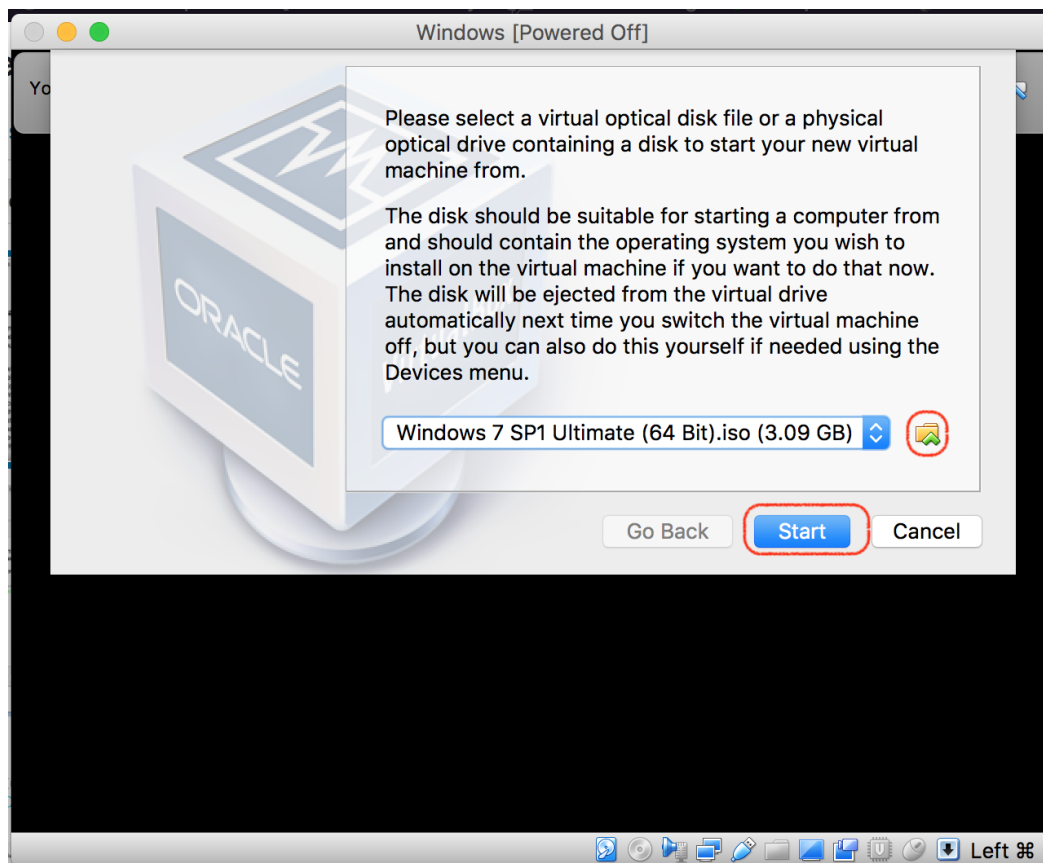

2.00 TB

[Go Back](#) [Create](#) [Cancel](#)

Now choose created VM and click on start.

Now you need to choose virtual optional disk file – windows Os file from you system and click on start.

Follow the steps and install windows on VM.

After successfully installation of windows operating system on oracle VM, install tally erp 9 on your system.. For procedure refer above steps how to instal Tally ERP 9 on windows.
